

Pat Jenakanandhini

Chief Product Officer at ArisGlobal

I'm a product executive with 20+ years of proven experience leading large scale B2B products in the areas of SaaS, mobile, cloud computing, platform, CAD, BIM and life sciences. I am currently Chief Product Officer at ArisGlobal leading teams of teams of fantastic product managers, UX and tech writers for multiple products in support of the life sciences industry. Prior to ArisGlobal, I was Senior Vice President at Accruent, a Fortive company producing enterprise software in facility and asset management including workplace and IWMS software. Prior to Accruent, I was the Chief Technology Officer at BlueCielo. At BlueCielo, I led the technology org including product management & engineering. Successes include the company's transformation from legacy on-prem software to SaaS, shifting business models from perpetual to a subscription model resulting in the success of acquisition of BlueCielo by Accruent. I'm passionate about solving real customer problems and generating business value. I have a proven track record of developing and executing strategic plans that are data driven, analytically measured and executed. Excellent communication skills, strong international experience and strong attention to detail round out my skill set. Colleagues know me as highly passionate about technology, a strong proponent of change and adapting to change. I'm enjoy speaking in public to audiences with varying levels of technical and language expertise. I have an MBA in Finance and dual BS in Computer Science and Process & Piping Design. I'm always interested in hearing from former colleagues or just interesting technology people, so feel free to contact me if you'd like.
